ZEPHER BRAND BOOK

ZEPHER

Zepher enhances the capabilities of engineering firms as a strong, manufacturing-oriented partner. We have real world experience and thrive on innovative problem-solving. We create industrial products that are practical and function-based. Our team is fun, passionate and friendly. We pride ourselves on developing high-quality products with integrity, on-time and on-budget.

The Zepher identity is designed to connect the common bond we share with engineering professionals—people who take complex problems and strive for the most simple solution. Zepher is a trustworthy, customer-oriented company that was created to provide diversified production support, manufacturing, planning, transportation and testing to implement the engineer's design goals with solid solutions.

LOGOTYPE USAGE

The logotype represents the Zepher brand in all communications and media. It has been mindfully designed to convey Zepher's inherent brand values of utilitarianism, professionalism and experience. Its role in representing these attributes to the world makes it an integral part of our mission to build and maintain equity in our brand. As such, its appearance must be uniform throughout all applications, and the graphic integrity of the logo and identity elements must be governed by the consistent use of established standards, observed in all communications with our vendors, affiliates, and the general public.

The Zepher logotype must be used exactly as it appears in this manual. The logo's relative size, orientation and spatial relationships have been precisely defined to create an integrated brand logo that is instantly recognizable and characterized by immediate visual impact. When placing and resizing the logo, these exact proportions and spatial relationships must be maintained.

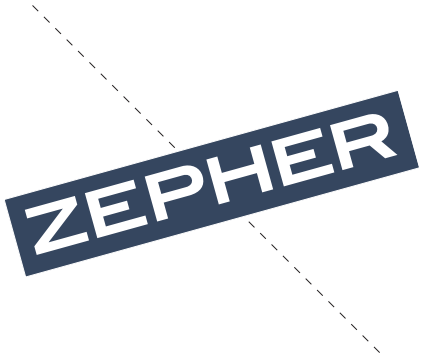
ZEPHER

Zepher Steel Blue = PMS 533 U

In the logotype, the name Zepher stands with strong simplicity: the solid letterforms convey confidence and the honest nature of the brand.

Clear space around a logo amplifies its significance and enhances its appearance. To preserve the logo's visual integrity and avoid diminishing its impact, it must never be crowded by extraneous elements such as text, photography, background patterns, or other symbols or logos. In all applications, please surround the logo with at least the minimum amount of clear space defined by this diagram.

Do not stretch vertically or horizontally or change the appearance of the logotype.



Do not rotate the logotype.

Never crop the logotype.

COLOR PALETTE

Primary

Steel Blue
PMS 533 U
RGB = 30 / 65 / 100
CMYK = 100 / 83 / 46 / 13
HEX = #38475e

Secondary
